EID PASSPORT EXPANDING TO MINOT, NORTH DAKOTA

Eid Passport Completes First Phase of Expansion on Schedule

MINOT, ND – February 24, 2011: Eid Passport is pleased to announce the completion of the first phase of development to open an office in Minot, North Dakota and has begun its construction phase. The company, which combines products and services to create identity authentication, background screening and access management solutions for corporations and Government entities, currently maintains locations in Portland, Oregon and Alexandria, Virginia. The company is expanding to Minot to create a Technical Support Center and expects to have its construction phase completed within the next 90 days.

"We are excited about our Minot, North Dakota expansion," said Eid Passport CEO Steve Larson. "It has been a pleasure to work with the City of Minot and the State of North Dakota and we look forward to completing phase two of our expansion plan as quickly as possible."

The Mayor of Minot, Curt Zimbelman states, "We are pleased a leading-edge technology company like Eid Passport has realized the strengths Minot has to offer and has chosen to expand their operations to our community. This provides increased job opportunities for Minot residents and that's something we can all be happy about."

"As a respected contractor for the Department of Defense and the Department of Homeland Security, Eid Passport is an ideal company for the Minot Area Development Corporation to work with," said Minot Area Development Corporation President Jerry Chavez. "We are very pleased with the progress of the process to date and look forward to Eid Passport's additions to Minot."

About Eid Passport

Eid Passport, Inc. (www.eidpassport.com) integrates leading-edge products and services into solutions that combine identity authentication, background screening and access management. Eid Passport's products and services make facilities, assets, and people safer and more secure. By using Eid Passport's *RAPIDGate*® Information System, highly secure facilities — such as military installations, government buildings,

federal agencies, manufacturing and distribution sites, ports and commercial buildings — can increase security and streamline access for a variety of authorized personnel.
